EXHAUST FANS AND BLOWERS

PVC, Poly-Pro, FRP, Polylast®, and Polystrong® Materials

CORROSION RESISTANT

KCH Services certifies that the CI and NH Fans shown herein are licensed to bear the AMCA Seal. The ratings shown are based on tests and procedures performed in accordance with AMCA publication 211 and comply with the requirements of the AMCA Certified Rating Program

EXHAUST FANS

WE CLEAN THE WORLD'S AIR AND WATER

100% CORROSION-RESISTANT FUME EXHAUST FANS

Exhaust fans are a critical component of any air pollution control system. KCH Engineered Systems manufactures a complete line of centrifugal exhaust fans and blowers. Each is built of the highest quality materials to withstand corrosive fumes and gases. Our fans are AMCA Certified and independently tested for performance.

PRODUCT INFORMATION

KCH Engineered Systems manufactures both direct or v-belt drive fans and exhaust systems, available in twenty different sizes with airflows up to 70,000 CFM. Constructed of POLYLAST™, POLYSTRONG™, FRP, stainless steel and special alloys, our chemical resistant fans can be equipped with variable frequency drives to ramp down airflow when needed.

To better serve our customers, KCH Engineered Systems offers a complete line of replacement parts, including:

- V-Belts
- Heavy Duty Bearings
- Vibration Isolators
- Wheels (Stainless or Coated Steel)
- Shafts
- Motors
- Complete Housings
- Coated Steel, Stainless Steel, or Galvanized Frames
- Belt and Shaft Guards
- Flexible Inlet Connectors

APPLICATIONS

- Municipal Odor Control
- Degasifiers/Aerators
- Corrosive Airstreams

BENEFITS

- Airflows to 70,000 CFM
- 100% Corrosion Resistance
- Quiet Operation
- Backwardly Inclined wheel for non-overloading operation
- POLYLAST™/POLYSTRONG™, FRP or Polypropylene Construction
- AMCA Licensed for Performance
- Dynamically Balanced for smooth operation

Additionally, our VFD Controlled, direct drive fans offer their own unique benefits including:

- Adjustable air flow control
- Smooth startup, ramp up and ramp down
- Elimination of motor starters
- No belts to maintain or replace
- Zero belt loss
- No pulley cost
- Extended bearing and motor life

Unusually Quiet

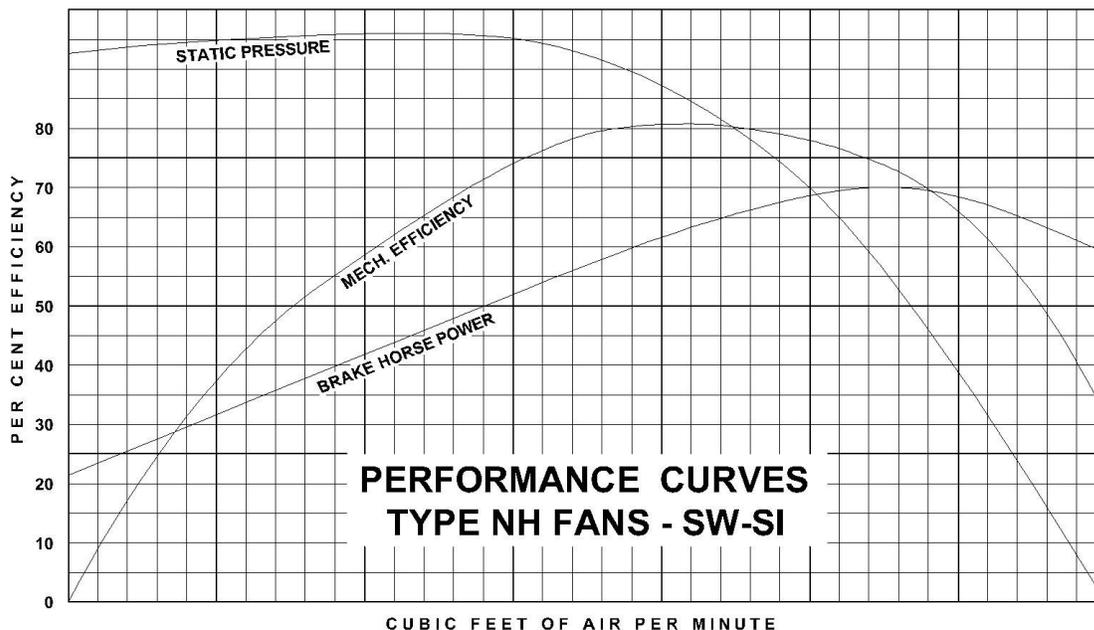

Type NH Fans, with their stable and efficient performance, are quiet in operation. In fact, quietness is one of the principal features of the Type NH design.

It should be emphasized that maximum quietness in actual operation depends not only on the choice of the fan itself, but also the system of which the fan is a part. Poorly designed ductwork of too light construction or with abrupt turns, as well as improper fan foundations, lack of proper isolation between fan and ducts, and poor acoustical conditions adversely affect the sound level of the installation.

A guide for selection of fan outlet velocities at various static pressures is shown in the table on the right. In general, choosing a lower outlet velocity for the static pressure involved results in quieter operation.

RECOMMENDED OUTLET VELOCITY FOR QUIET OPERATION	
STATIC PRESSURE	OUTLET VELOCITY RANGE
1/4"	700 - 1000
3/8"	800 - 1100
1/2"	900 - 1200
5/8"	975 - 1300
3/4"	1050 - 1400
7/8"	1125 - 1500
1"	1200 - 1600
1 1/4"	1300 - 1750
1 1/2"	1400 - 1900
1 3/4"	1500 - 2050
2"	1600 - 2200
2 1/2"	1800 - 2500

Excellent Performance

PERFORMANCE AT OTHER THAN STANDARD CONDITIONS

Any particular fan, operating at a constant speed on a fixed system when there is no internal heat exchange involved, will deliver the same volume of air but the static pressure and brake horsepower will vary with the density. The capacity tables in this catalog are based on the fan handling standard air at a density of .075 lbs. per cubic foot corresponding to 70° F. and 29.92" Hg. barometric pressure. Therefore when the fan handles air or other gases at other than standard densities due to temperature, altitude or the kind of gas, the published tables should be used in the following manner.

GENERAL METHOD

Step 1 Compute the equivalent static pressure in the following manner:

$$\text{Equivalent SP} = \text{Required SP} \times \frac{.075}{\text{Actual Density}}$$

When both temperature and altitude vary from standard,

$$\text{Actual density} = \frac{\text{Density at temp.} \times \text{density at alt.}}{.075}$$

(See chart below)

Step 2 Using the required CFM and the equivalent SP, obtain the RPM and BHP from the standard capacity table, interpolating when necessary.

Step 3 The RPM obtained is the correct value. The BHP obtained must be corrected for the actual density as follows:

$$\text{BHP (from table)} \times \frac{\text{Actual density}}{.075}$$

EXAMPLE

Determine RPM and BHP required for a No. 40 1/4 NH fan, SW-SI for 16,800 CFM, 1 1/2" SP, 250° F., 5000' altitude.

Step 1 $\text{Equivalent SP} = 1.5 \times \frac{.075}{.0465} = 2.42"$

$$\text{Actual density} = \frac{.056 \times .0623}{.075} = .0465$$

Where .056 is read from temperature curve and .0623 from the altitude curve. (See chart below.)

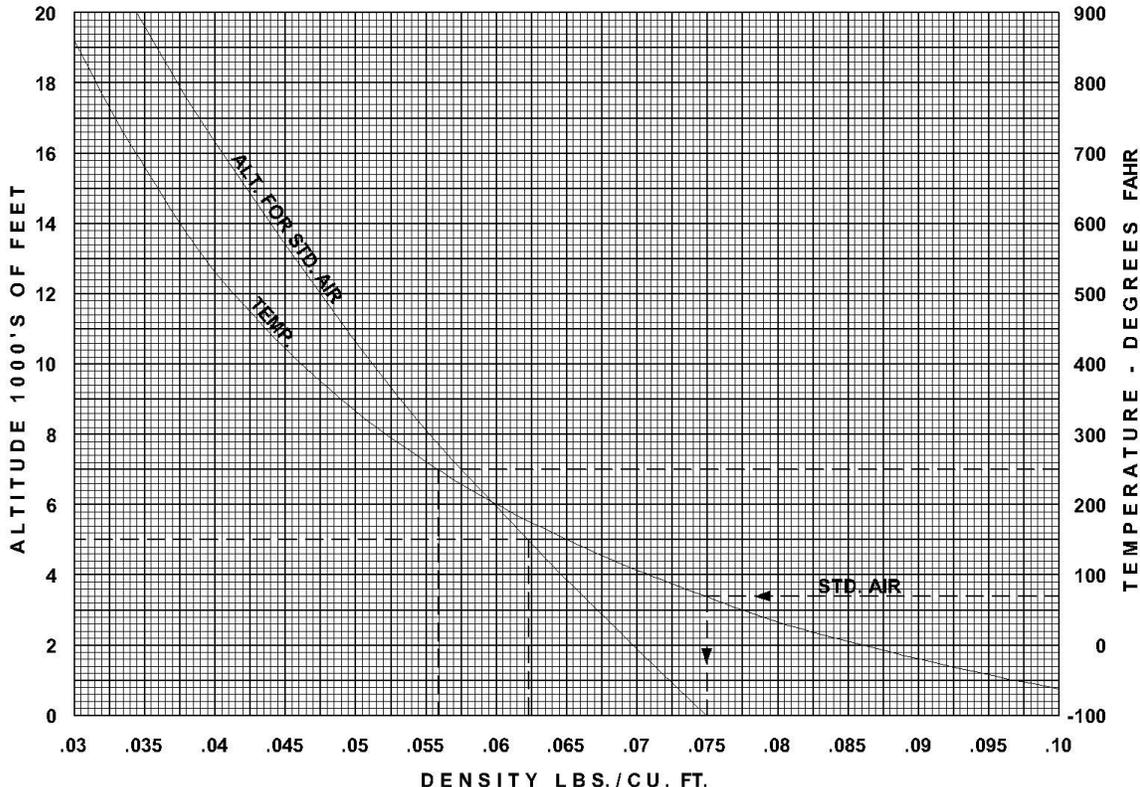

Step 2 From Capacity Table for No. 40 1/4, by interpolation:
RPM = 699
BHP = 9.07

Step 3 Actual RPM required = 699

$$\text{Actual BHP} = 9.07 \times \frac{.0465}{.075} = 5.62$$

Correct performance is:

16,800 CFM, 1 1/2" SP, 699 RPM, 5.62 BHP, when handling air at 250° F, and 5000' elevation.

Max. BHP = 2.21

KCH Services certifies that the CI & NH Fans shown herein are licensed to bear the AMCA Seal. The ratings shown are based on tests and procedures performed in accordance with AMCA publication 211 and comply with the requirements of the AMCA Certified Ratings Program.

Table with 21 columns: Volume of Air CFM, Outlet Velocity FPM, 1/2" SP (RPM, BHP), 1" SP (RPM, BHP), 1-1/2" SP (RPM, BHP), 2" SP (RPM, BHP), 2-1/2" SP (RPM, BHP), 3" SP (RPM, BHP), 3-1/2" SP (RPM, BHP), 4" SP (RPM, BHP), 4-1/2" SP (RPM, BHP), 5" SP (RPM, BHP). Rows include CFM values from 2417 to 10359.

Table with 21 columns: Volume of Air CFM, Outlet Velocity FPM, 5-1/2" SP (RPM, BHP), 6" SP (RPM, BHP), 6-1/2" SP (RPM, BHP), 7" SP (RPM, BHP), 7-1/2" SP (RPM, BHP), 8" SP (RPM, BHP), 9" SP (RPM, BHP), 10" SP (RPM, BHP), 11" SP (RPM, BHP), 12" SP (RPM, BHP). Rows include CFM values from 5180 to 13121.

All Capacities Based on Standard Air (Density .075#cu.ft. - 70 deg. F. - 29.92" Hg. Bar.)

NOTES: (1)These ratings cover the performance of BOTH Class II and Class III Type NH Fans. Class II Fans can be used for ratings printed in white areas ONLY. Class III Fans can be used for ALL ratings printed in white and grey areas. (2) Ball bearings are standard on all Type NH Fans. (3) Values underlined indicate the most efficient point of operation for each pressure. (4) Performance shown is for installation type B & D - Free or ducted inlet, Ducted outlet. (5) Performance ratings do not include the effects of appurtenances in the airstream. (6) BHP does not include drive losses.

All Capacities Based on Standard Air (Density .075#cu.ft. - 70 deg. F. - 29.92" Hg. Bar.)

NOTES: (1)These ratings cover the performance of BOTH Class II and Class III Type NH Fans. Class II Fans can be used for ratings printed in white areas ONLY. Class III Fans can be used for ALL ratings printed in white and grey areas. (2) Ball bearings are standard on all Type NH Fans. (3) Values underlined indicate the most efficient point of operation for each pressure. (4) Performance shown is for installation type B & D - Free or ducted inlet, Ducted outlet. (5) Performance ratings do not include the effects of appurtenances in the airstream. (6) BHP does not include drive losses.

SIZE 49

SINGLE WIDTH
SINGLE INLET

KCH TYPE NH FANS

NON-OVERLOADING MEDIUM SPEED HIGH EFFICIENCY

CLASSES

II AND III

Outlet Size 39" x 51-1/8" I.D.

Wheel Diameter 49 in.

Inlet Size 51-5/8" I.D.

Outlet Area 13.846 Sq. Ft. Inside

Tip Speed = RPM x 12.83

Max. BHP = 71.34

KCH Services certifies that the CI & NH Fans shown herein are licensed to bear the AMCA Seal. The ratings shown are based on tests and procedures performed in accordance with AMCA publication 211 and comply with the requirements of the AMCA Certified Ratings Program.

All Capacities Based on Standard Air (Density .075#cu.ft. - 70 deg. F. - 29.92" Hg. Bar.)

NOTES: (1) These ratings cover the performance of BOTH Class II and Class III Type NH Fans. Class II Fans can be used for ratings printed in white areas ONLY. Class III Fans can be used for ALL ratings printed in white and grey areas. (2) Ball bearings are standard on all Type NH Fans. (3) Values underlined indicate the most efficient point of operation for each pressure. Performance shown is for Type NH exhaust fans with inlet and outlet duct. BHP does not include drive losses.

70465	3400	800	98.90																		

All Capacities Based on Standard Air (Density .075#cu.ft. - 70 deg. F. - 29.92" Hg. Bar.)

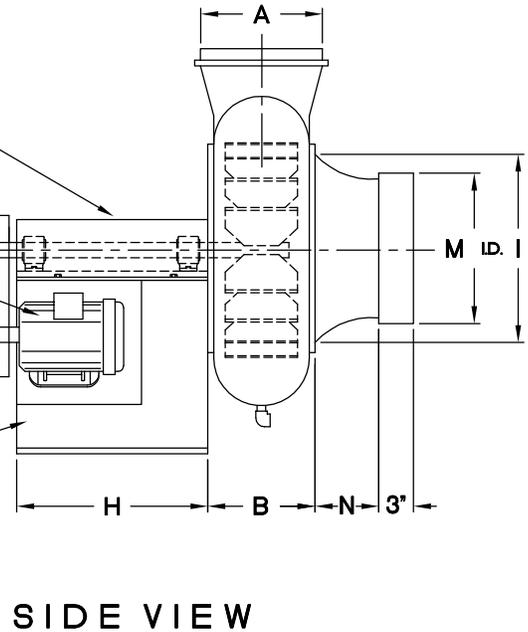

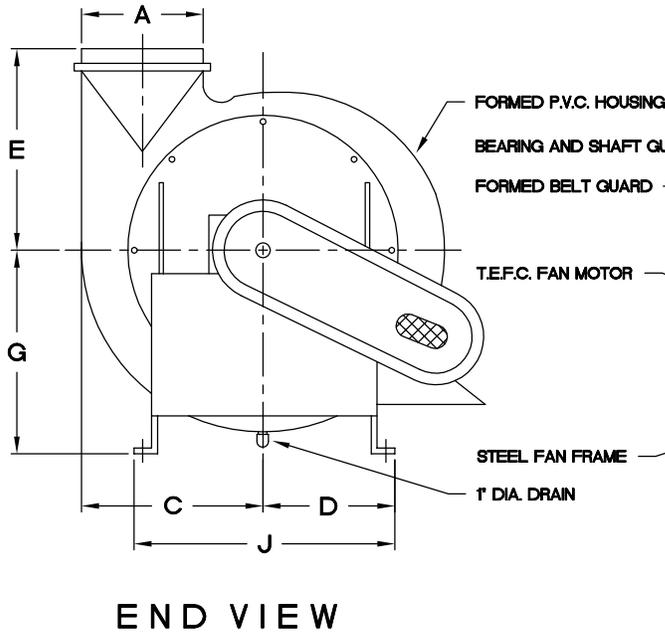

NOTES: (1)These ratings cover the performance of BOTH Class II and Class III Type NH Fans. Class II Fans can be used for ratings printed in white areas ONLY. Class III Fans can be used for ALL ratings printed in white and grey areas. (2) Ball bearings are standard on all Type NH Fans. (3) Values underlined indicate the most efficient point of operation for each pressure. (4) Performance shown is for installation type B & D - Free or ducted inlet, Ducted outlet. (5) Performance ratings do not include the effects of appurtenances in the airstream. (6) BHP does not include drive losses.

KCH Services certifies that the CI and NH Fans shown herein are licensed to bear the AMCA Seal. The ratings shown are based on tests and procedures performed in accordance with AMCA publication 211 and comply with the requirements of the AMCA Certified Ratings Program.

NH - SERIES BLOWER PARTS LIST

Direct Drive **Exhaust Fan**

An *Energy Efficient,*
Direct Drive, Adjustable Speed,
Centrifugal Fan

100 % Corrosion Resistant

- ◆ PVC, FRP, or Polypropylene Construction
- ◆ Excellent Performance
- ◆ AMCA Rated

Variable Frequency Drive

- ◆ Adjustable Air Flow Control
- ◆ Significant Energy Savings
- ◆ Smooth Startup, Ramp Up, and Ramp Down
- ◆ Easy To Use Interface
- ◆ Computer Network Connectable
- ◆ Eliminates Motor Starters

Direct Drive Arrangement

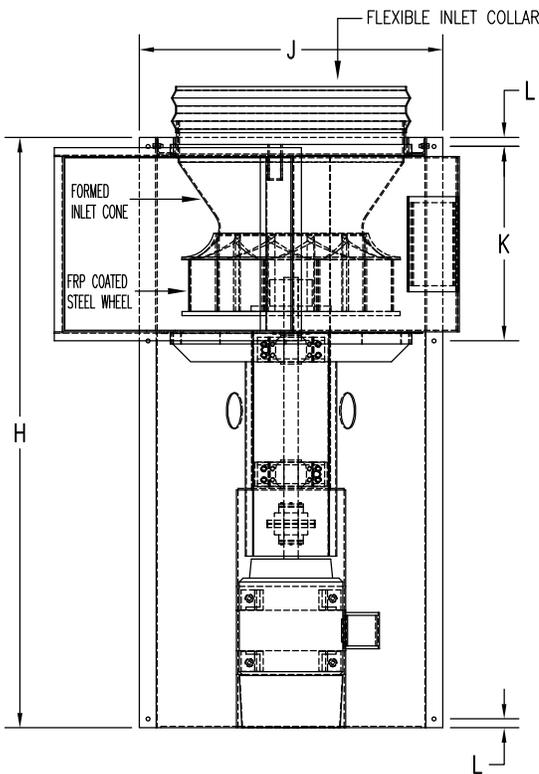

- ◆ No Belts To Maintain or Replace
- ◆ No Pulley Cost
- ◆ Extended Bearing Life
- ◆ Extended Motor Life

*“ A KCH Direct Drive
Exhaust Fan
can save thousands
of dollars on your utility bill”
Greg Andrews—Vice President
S & S Plating*
